

We are a young, international, creative team and offer scientific and technical measurement and development services, as well as our own measurement systems for thermal characterization and failure analysis for a wide range of customers in the global electronics and automotive industries.

We are currently looking for a:

Student assistant – from engineering or technical/scientific degree programs, electrical engineering, microsystems technology, mechatronics, physics, physical measurement technology or comparable degree programs

Start: immediately

Tasks:

- » Support in the execution and evaluation of measurement tasks
- » Preparation of measurement reports
- » Research activities
- » Support in the development of new measuring devices

Your profile:

- » Careful and structured way of working
- » Willingness and ability to explore new topics
- » Good knowledge of Microsoft Office
- » Knowledge of LabView, SolidWorks desirable
- » Creativity, openness and reliability
- » Enrollment at a German college/university

This is what we offer:

- » Helpfulness, transparency and team spirit in a flat hierarchy
- » Flexible working hours
- » Direct supervision of work by our competent team
- » Opportunities for further scientific and technical training
- » Insight into the world of thermics of electronic systems and their components

Interested? Contact us at any time.
